

XXX NATIONAL CONGRESS OF GEOCHEMISTRY CHIHUAHUA 2020

The most important geochemistry congress in Mexico

SECOND CIRCULAR

The National Institute of Geochemistry and the Autonomous University of Chihuahua extend a very cordial invitation to participate in our next XXX National Congress of Geochemistry Chihuahua 2020, to be held at the facilities of the Engineering Faculty from September 28 to October 2 of the current year.

After the successful XXIX National Geochemistry Congress held at the C.I.C.E.S.E. facilities in the city of Ensenada, Baja California in 2019, this XXX National Congress of Geochemistry Chihuahua 2020 thus continues a tradition of congresses that brings together researches involved in all kinds of topics of Geochemistry. The objective of the congress is to offer to the scientific communities the research experiences that are currently being carried out by those who are involved in the study of Geochemistry in the universities, research centers, institutes, government agencies, private companies and individually.

By virtue of health contingency derived from COVID 19 in which we are globally immersed, the congress will be offered in virtual (remote) mode through videoconferences. In the event of “turning green the Mexico’s Traffic Light Monitoring System for Epidemiological Risk”, the face-to-face modality will be allowed for those who wish so.
